RE: FEDERAL PRISONER DANIEL SMITH, # 74882-065

Dear First Lady Melania,

I write you today to ask you to help me and others secure the liberty of Daniel Smith, a political prisoner and Big Pharma hostage, presently being held by federal authorities/the Bureau of Prisons in the Federal Detention Center at Seattle, WA.

Daniel, a married man with children was imprisoned for selling a substance known as MMS, commonly known as Chlorine Dioxide, which when ingested kills all parasitic organism without harming the children or persons taking it. In Daniel's case (1) not a single individual who purchased MMS complained of being sold something that did not work as expected, (2) no one had an issue with its price as it is only a few dollars per bottle and you take it in drop amounts, (3) no one had any sickness; on the contrary, the only comments were those of positive results, and (4) no one complaint of being ripped off. And yet, the federal prosecuting authorities with guidance from the Food and Drug Administration went against Daniel in full force, threatening him with +30 years in prison and ending by giving him over 4 years to serve.

Daniel is in the process of his appeal, but from the lower court to the higher court, he has been railroaded all the way by abusive and corrupt federal authorities, including the judge presiding over his case, part of the swamp our President Trump talks so much about. Daniel deserves to be freed immediately.

I wrote to President Trump recently asking that he pardon Daniel, but he has so much in his hands right now, and who knows how much information about government and corporate corruption is being withheld from him, that I decided to write you as well. Attached you will find my letter to President Trump with more details and I ask you to please discuss this serious matter with him to see if he will Pardon Daniel, and preferably also to punish all of the corrupt governmental offices responsible for putting him in prison. An example has to be made criminals in order to deter others from doing the same thing.

MMS is such an incredible healthy and safe substance to use that it has even cured autism. Together with this letter I am sending you the book "Healing The Symptoms Known As Autism" by author Kerri Rivera. She has cured more than 400 children of autism. Kerri was kind enough to donate this book and sent you a message, which I stapled to the book. I wrote an article on MMS, which you can see at <http://tinyurl.com/RB-MMS-Study>. It proves that MMS is safe and that it works without any side effects as we seen in all Big Pharma TV commercials.

There are many natural cures for most all diseases that Big Pharma with its influence in government has tried and has also succeeded in hiding from the general public, furiously discrediting those treatments publicly. It is time to put a stop to such corruption. Please help make Daniel's release the beginning of the liberation of the holistic and nature cures movement.

Respectfully,

Ricardo Beas
