

FILM PROJECTS

DOCUMENTARY | MUSIC VIDEO | ANIMATION

In addition to the music my band and I are producing, I would like to provide a series of media projects to accompany the album. My goal is to build a dependable and professional crew full of team players who want to be involved the creative vision of this project. I want to try to incorporate everybody's goals and create a project that everyone can benefit from. I'm currently providing PR Kits and music samples to a number of directors, and other media professionals with varying backgrounds (cinematographers, assistant directors, camera experts, editors/ technicians, etc.). I understand the importance of building a good team and I have had great success doing so in the past. I am aware of budgetary needs and will not require any sort of out of pocket expenses related to the crew. Although I have expectations and plans for these projects, I am open to all ideas and contributions. My schedule is flexible to allow for ease in coordinating with the complex timelines of film professionals.
