

Do The Math

Calman Hart

He said "Maryann I don't understand
But I know that we can make it all okay
We've got 30 years together now
Do the math before you walk away"

He said "Maryann don't pack your bags
Just tell me what to do to make you stay
We've worked all our lives to build this home
Please do the math before you walk away"

He said "Maryann, give me one more chance
We've got a daughter and a son and a grandchild on the way
There's so many things that prove our love
Please do the math before you walk away
Before you walk away"

Then Maryann, she turned around
She looked at him just long enough to say
"John, there's one of me, and one of her"
You do the math", and then she walked away
